THE O. & O. Company's Steamship "DORIC" will be despatched for SAN FRANCISCO, SHANGHAI, NAGASAKI, KOBE, INLAND SEA, YOKOHAMA and HONOLULU, on TUESDAY, the 1st September, at Noon, taking freight for Japan, the United States, and Europe. Passengers are allowed to break their journey at any point en route.

Through Passage Tickets granted to England, France and Germany by all trans-Atlantic lines of Steamers, and to the principal cities of the United States or Canada.

Passengers holding through ORDERS TO EUROPE have the choice of the Overland Rail Routes from San Francisco, including the SOUTHERN PACIFIC, CENTRAL PACIFIC, UNION PACIFIC, DENVER and RIO GRANDE, and NORTHERN PACIFIC RAILWAY; also the CANADIAN PACIFIC RAILWAY on payment of £4 in addition to the regular tariff rate.

Passengers holding Orders for OVERLAND CITIES in the United States have between SAN FRANCISCO and CHICAGO, the option of the SOUTHERN PACIFIC, CENTRAL PACIFIC, UNION PACIFIC, DENVER and RIO GRANDE, and other direct connecting Railways, and from Chicago to destination the choice of direct lines.

Special rates (First-class only) to European Ports, are granted to Missionaries, Members of the Naval, Military, Diplomatic and Consular Services, and European Civil Service Officials located in Asia, and to European Officials in the Service of the Governments of China and Japan.

Return Passage.—Reduction will be made to passengers who do not hold return tickets, making the return journey between ports in the Orient and Honolulu or beyond within twelve months.

Through Bills of Lading issued for transportation to Yokohama and other Japan Ports, to San Francisco, to Atlantic and Inland Cities of the United States, via Overland Railway, to Havana, Trinidad, and Demerara, and to ports in Mexico, Central and South America, by the Companies' and connecting Steamers.

Freight will be received on board until 4 P.M. the day previous to sailing. Parcel Packages will be received at the Office until 5 P.M. same day; all Parcel Packages should be marked to address in full; value of same is required.

Consular Invoices to accompany each shipment of Cargo or parcel (valued at \$100. Gold or over) destined to Ports, beyond San Francisco, in the United States, should be sent to the Companies' Office addressed to the Collector of Customs at San Francisco.

Merchant's Invoice will be sufficient for cargo or parcel (each shipment) when the value is less than \$100. U.S. Gold.

For further information as to Passage and Freight, apply to the Agency of the Companies, Queen's Building.

THESE DOCKS are conveniently situated in Yokohama harbour and the attention of Captains and Engineers is respectfully called to the advantages offered for Docking and repairing Vessels and Machinery of every description.

The plant and tools are of recent patterns for dealing quickly and cheaply with work, and a large stock of material is always at hand, (plates and angles all being tested by Lloyd's surveyors).

Two powerful Twin Screw Towboats are available for taking Vessels in or out of Dock, and for taking Sailing Vessels in or out of the bay. The floating derrick is capable of lifting 35 tons.

Steam Launches of Steel or Wood, Lighters, Steel Buildings and Roofs, Bridge Work, and all kinds of Machinery are made on the premises.

Tenders will be made up when required and the workmanship and material will be guaranteed.

The cost of Docking, and repair work, will be found to compare favourably with that of any port in the world.

THE GRANDEUR OF MELODY.

(BY A HANKER.)

Probably the most sublime and magnificent concerted music ever heard on this earth is the rendering of Handel's oratorios at the triennial festival (as recently held) by the choir of about four thousand voices and instruments at the Crystal Palace.

The time-honoured National Anthem having been sung, after a few recitatives the double choruses of "Israel in Egypt" are thundered out:—"He spake—the word,—and there came flies, and lice in all their quarters." The entire vast orchestra seems to be enveloped in a swarm of buzzing, stinging insects, accompanied by the strident bellowing of the wings of hordes of locusts; while a shudder seems to pass over the thousands of vocalists as they hiss out the recital of the crawling irruption of the noisome vermin.

And then—"He gave them hail stones for rain." First one side of the orchestra, alone, then the other side, sing out the graphic narration, and then, in a moment, with a mighty flood of pulsing melody, every voice, every instrument, unites with the great organ, the deep roll and rattle of drums, and the blasts of trumpets, in the ringing out, with startling resonance, the recital of the awful plague:—"Fire, fire, ran along the ground, fire, mingled with the hail, ran along the ground." And now, after the Egyptian host has perished in the Red Sea, comes the psalm of triumph, the exultant choral of praise for deliverance and for victory. "He hath triumphed gloriously; the sea and his rider hath. He thrown into the sea; the Lord shall reign for ever and ever"; the entire trumpet-tongued orchestra pealing forth the stately and august strains of that majestic psalmody and magnificent anthem of thanksgiving.

But of all the choruses, the "Hallelujah," from the "The Messiah" is by far the most transcendently sublime. And truly it must be beyond measure the finest and most reverent and triumphant essay to render adoration to the Eternal which mortal man can ever have attempted. Who can hear the Hallelujah chorus sung by several thousands of voices, accompanied by hundreds of performers on all kinds of instruments, without a very thrill of rapt emotion coursing through his veins, or without experiencing a throbbing of enraptured soul-stirring ardour. And as the echoes of the glorious harmony resound in all their bewildering magnificence, and the jubilant hosannas rend the air in a pealing diapason of solemn majesty, the spell-bound hearers must realize, though but faintly and imperfectly, that if frail man can produce such a majestic harmony, the music of the choirs of heaven must indeed be glorious and sublime.

And we come away from the wonderful performance, with the strains of the "passion" choruses still ringing in our ears—"With His stripes we are healed." "The Lord hath laid on Him the iniquity of us all," and all those other plaintive and beautiful numbers describing the sufferings of the Saviour on our behalf, we must, unless indeed we have a heart of stone, feel that we must then and there fall at His feet and profit the love and the ardent adoration of our heart.

TIENTSIN.

(From Our Own Correspondent.)

August 11th.

The Empress Dowager has endeavoured to stop gossip by the issue of a popular leader refusing any honorific characters on the occasion of her birthday, as the selection of two more to add to the sixteen she already possesses was under discussion. Each character represents an annual income of Tls. 360,000, the edict therefore saves officials Tls. 720,000 a year; but it does more, it turns public opinion which had been building over with indignation back into the groove of thinking the Empress Dowager is not such a bad sort after all. While thus soothing suspicion to rest she and her crew are carefully prosecuting the anti-progressive crusade, and a veritable time of terror has been introduced by the offer of 3rd class metropolitan rank to any one who will arrest any prominent reform leader, or the recovery of forfeited rank to those who arrest a particularly notorious and influential man. It will be seen at once that such an offer, though it has only been unofficially notified, will set every man spying on his neighbour, afford boundless opportunity for personal animosity and jealousy to have full play, and for bribery and extortion to reap a rich harvest, and it is to be feared a very great number of unjust arrests will be made. Mea while the luckless first graduate at the recent exams, Ling Tze-yi, who is accused, or at least suspected, of being a Wei connection of Leang Chi-chow, the Kang party journalist who had a paper in Japan, is in prison and has already lost all his scholarly rank. It is uncertain yet what will be done with him. Report is now trying to make out that Shen, when he was being tortured, gave the names of a number of his compatriots who were members of his society, and was about to give the names of 24 officials in Peking when he was strangled. I think we may fairly put all this down to nonsense, as Shen was not the man I think to give his fellow-reformers away. It is also stated the Russian Minister has claimed protecting rights over several minor officials whom he believes might be "attached," but this is also I think unreliable.

The British Consulate here has recently been enlarged slightly and a court room for the first time built. In the old days before the siege there were no lawyers in Tientsin, and no one minded much whether there was a court room or not. But now there are four or five of the legal fraternity all bound to make business it is of some consequence, so a more or less suitable room has been built. Moreover, the royal arms have been mounted over the gateway, there being nothing hitherto to distinguish the building and entrance.

There is little business doing now and the folks at Peking are much more numerous in consequence.

August 13th.

The lay of the wind in Peking is indicated by the following items:—The Empress Dowager has it in mind to promote Chiu Kwei, the official who caused the late Mr. Shen to be arrested and executed, to the rank of Chief President of Government Boards, also to give the Chief of Police who carried out his orders a civil appointment. Prince Ching at a recent audience protested very strongly against such an unwise policy, but his petition was received in strong silence and he was permitted to rise from his knees and go away without any indication that his words had had any effect. That the protest was useless and that the Imperial mind is resolutely fixed upon a reckless course may be inferred from the further report that another list of reformers or so-called secret society men has been sent out from the Palace, while telegrams have been despatched in all directions ordering the immediate arrest of all the 40 men mentioned therein. In addition, offers of rank have been made to those arresting any prominent reformers, and promises of restored rank and position to degraded officials for the same service. Added to all this comes a report which has unfortunately a strong smack of probability about it, namely, that in future no Cantonese, Fukienese, Hanneese or other variety of Southerners shall receive either appointment or promotion. If this is true it is virtually a challenge to the South thrown down by the North, and if the South takes it up we bestride China. Who can blame the South if it does! I must say my sympathies are wholly Chinese as distinct from the Manchu and Northerner. It may be a blow aimed by his enemies at Viceroy Yuan Shi-kai who has surrounded himself with shrewd Cantonese officials, and marked himself as suspicious in consequence.

Marshal Su, who is now in the hands of the Board of Punishments, has been confined in the very chamber where poor Shen was beaten to death, and none of the traces of the foul murder had been removed. Whichever way the wretched official looked he saw the blood of the martyred journalist with its mute tale of horror, and he could not stand it. He managed to secure Tls. 800 and bribed the runners to put him into some other room. This idea is bound to take on, and the torture chamber will doubtless prove a veritable gold mine to the inhuman vultures of the Yamen, till the gory stories become invisible through dirt.

The French Minister is again teasing the Yamen about Viceroy Tseng fulfilling all the promised privileges given by Wang Tze Chun and the Wai Wu-pu is fencing behind pleaded ignorance of what these privileges were, and promises to investigate.

HONGKONG, THURSDAY, AUGUST 27, 1903.

CRUELTY TO ANIMALS.

Before the following lines appear in print, the inaugural meeting of the Hongkong Society for the Prevention of Cruelty to Animals will have been held this afternoon. Thanks to Mr. E. A. Hewett's initiation that gentleman has succeeded in arousing sufficient interest in the Colony, so that the formation of the Society will be to-day *in fait accompli*. The importance of these societies should be more fully understood by the people. The aim has been and is to inculcate the principle of kindness to man and beast; for in this the Society will be offering the most permanent relief to the suffering. It was observed by Mr. N. P. Cole, in his presidential address to the members at the thirty-fourth meeting of a similar society in San Francisco, that, in carrying on the work to complete success we must rely largely on humane education. The people, and especially the members of the Society, must be instructed as to the relation they sustain to the race of animals that God has created for the use and the convenience of mankind, and also the relation they sustain to the oppressed and degraded children who must be raised to a better life or become a tax to the county or a curse to the community. Therefore, a responsibility rests on all good people to speak for and defend the helpless. It is one of the auspicious signs of the times that a new interest has awakened in the rights and comforts of the dumb animals. The people in many ways are receiving a higher education, and humanity is taking a wider range. In this beneficent task all ought to take part, doing what every one can for the benefit of what some one has called "our poor relations." From the report just quoted we learn that until thirty-seven years ago the animal creation in the United States of America had no recognized defenders. Until that year there were no laws for the prevention of cruelty to animals worthy the name. The assertion that such laws were necessary was received, as it had previously been in England and France, with outburst of derision, and now in this new century what an immense change has there been effected in this respect. "Human laws have been enacted which are doubtless often evaded, but which, when enforced, are sufficient to prevent any and every form of wanton cruelty." So soon as our own Society begin to exercise its functions, it may be taken for granted that efforts will be made to secure legislative co-operation from the Government, without which the work of the Society should be considerably hampered. In any enactment that might be passed by the local Legislature it is to be hoped that some such provisions as are contained in the excellent law enacted by the California Senate in 1874, and amended as recently as 1901, will be embodied. We especially commend to the notice of the Committee of the Society that will be for many established this afternoon the following sections of the Act for the more Effectual Prevention of Cruelty to Animals:—

Section 6.—Any person who overdrives, overloads, drives when overloaded, overworks, tortures, torments, deprives of necessary sustenance, drink or shelter, cruelly beats, mutilates, or cruelly kills any animal, or causes or procures animal to be so overdriven, overloaded, overworked, tortured, tormented, deprived of necessary sustenance, drink or shelter, or to be cruelly beaten, mutilated or cruelly killed; and whoever having the charge or custody of any animal either as owner or otherwise, subjects any animal to needless suffering, or inflicts unnecessary cruelty upon the same, or in any manner abuses any animal, or fails to provide the same with proper food, drink, shelter or protection from the weather, or who cruelly drives, rides, or otherwise uses the same when unfit for labour, shall for every such offence, upon conviction, be deemed guilty of a misdemeanor.

Section 7.—If any person shall carry, or cause to be carried, in or upon any vehicle, or otherwise, any domestic animal, in a cruel or inhuman manner, or knowingly or wilfully authorizes or permits the same to be subjected to unnecessary torture, suffering, or cruelty of any kind, shall, upon conviction, be deemed guilty of a misdemeanor.

UNLAWFULLY behaving in a disorderly manner at Tin Hau Temple, Causeway Bay, thereby damaging property to the value of \$1.70, was the charge against two native weavers, by the name of Pun Tak and Cheong Wai. At the Magistracy this morning by Mr. T. Sercombe Smith they were each fined \$1.50 and had to pay \$1.35 compensation.

AN Ordinance is about to be introduced in the Singapore Legislative Council supplementing the Military Manoeuvres Ordinance of 1902 by enabling the Governor in Council permanently to set apart definite area in the Colony, either for military manoeuvres or firing exercises. Thus the military authorities will acquire a sort of "casingment" over the lands, to perform military manoeuvres or firing exercises whenever they choose.

MESSRS. S. C. Farnham, Boyd & Co., Ltd., successfully launched from their Pootung Works on the 24th inst., the fourteenth revenue cruiser built to the order of the American government for service in Philippine waters. Promptly at 1.30 the launching signal was given by Mr. Mackenzie, manager, and as the vessel glided majestically down the ways, Mrs. Struive in a graceful manner performed the christening ceremony by breaking a bottle of champagne on the stem and wishing success to the *Mindoro*. The vessel is the sister ship to the *Mindanao* recently launched.

Mail your films and Kodak orders to LeMunyon, P. O. B. 368.—*Adv.*

THE weekly Topicist writes in the *S. F. Press*: The Rev. Mr. Hardy of Hongkong, who appears to have made the sacred fire of the domestic altar his special study, and has published the results of his experiences in "How to be Happy though Married," has his imitators in the pulpit. But some of these rush rashly in where even a Hardy fears to tread. Probably, poor things, they are bachelors; but that hardly matters in the only profession which expects one to teach that which one does not know oneself. The consistency of the policy will be at least admitted. This in face of clerical "didacticity" will tickle young mammals, or those ladies who have a reasonable expectation of acquiring that status.

WHEN *L. & C. Express* are gradually gaining some insight into the views of the United States Commission that is visiting Europe with the object of seeking to arrange for a general scheme whereby silver-using countries can be brought into more harmonious monetary relations with the gold currency countries. The statement made from Berlin and the other information we have previously given leads us to the conclusion that we shall not have to wait very long for some definite pronouncement of the principles arrived at. For Mexico the question is not nearly so complicated as is the case of China, but it is satisfactory to know, as we have already stated, that the Commission has arrived at a conclusion as to China.

It is reported that the members of the Tibet Sikkim Mission have now all reached Kham-lajong, but there are no signs yet of the proper representation of Tibet and China. Major Brotherton, who is in charge of the mission's transport arrangements, has left Darjeeling.

AT about 7.30 o'clock last night a celestial, having imbibed too freely of *samsu* took to the street and started an uproar. An Indian constable warned him to desist, but John paid no heed, and without further ado "Sam" with the aid of a lukong marched him off to the lock up. At the Magistracy this morning he was fined \$1 or seven days' hard.

THE Ganges Railway Bridge in Cawnpore crosses the river two miles out of Cawnpore in the direction of Lucknow and has the rails above and the roadway below. It was constructed in 1874, and ever since then a toll has been levied on foot passengers and vehicular traffic. One would have fancied that like the Floogly bridge at Howrah (Calcutta) the bridge toll would have long ago paid for the bridge. The daily takings from tolls range between Rs. 80 and Rs. 100.

By kind permission of Major Radcliffe and Officers, the Band of the 33rd Burma Infantry will play at the Hongkong Hotel to-morrow (Saturday) evening from 8 to 9.30 p.m.

AT the Magistracy this morning before Mr. T. Sercombe Smith, two native fishermen from San Tin were charged with assaulting and injuring one of their fraternity, who had to be removed to Hospital. The complainant stated that, as he was working in his boat, the two defendants came up and stole his shrimps. Words were then exchanged with the result that he was defeated and injured. The case was remanded till noon to-morrow that the Sergeant in charge of the case may appear to give evidence.

Framing, fancy and artistically done by LeMunyon, 31, Des Voeux Road.—*Adv.*

THE general committee, of which the Duke of Argyll is president, formed to establish a Memorial to the late Sir Hector Macdonald, is receiving considerable support. The following letter has been received by the committee:—"Having ascertained that the subscriptions to General Sir Hector Macdonald Memorial Fund are likely to amount to about £4,000 within a fortnight, I take pleasure in informing you that my promised cheque for £1,000 will be placed at your disposal at that time. I also hereby renew my promise to send you a second £1,000 when your next £4,000 are subscribed. Yours very faithfully, JOHN BANNON."

Subscriptions varying from one shilling to a hundred pounds have been received. The memorial is being enthusiastically supported by Scotsmen and the public generally in the "Britains over the Seas" as well at home.

AT the Magistracy this morning before Mr. T. Sercombe Smith a native (21) was charged with stealing 26 taels from his uncle. It was alleged that, while at Canton, he asked his uncle for the loan of some money to proceed to some Coast port to start business. The uncle refused, and to his surprise a few days later found that his nephew and 26 taels from his trunk were missing. The nephew had proceeded to Hongkong and the matter got to the knowledge of the police and he was arrested. He told the police that the money was given to him by his uncle, who was sent for. At the Magistracy this morning the uncle denied having given the money which, he said, belonged to his brother. He told his Worship that his nephew was a good and "ambitious" lad, and begged his Worship to release him. Mr. Sercombe Smith found the charge proven and sentenced the lad to four months' hard labour.

FURTHER evidence was again heard this afternoon before Mr. T. Sercombe Smith at the Magistracy, regarding the falling of the wall at Mui Kwai Lane. Mr. Olvedeio Neves stated that he visited the buildings every other day, sometimes in the morning and sometimes in the afternoon. He knew the three contractors and overlooked their work continually. Mr. Haggard always accompanied him whenever he visited the buildings. The bondings were bad, but he did not report. He was there on the day after the wall fell. He knew the wall and thought Kung Cheong erected it to a height of two feet above the first floor. Boxim was the next man working at the wall and built it as far as four or five feet above the second floor. He thought Kung On-laid the foundation. He said he was wrong if he said Boxim did not finish the wall. He did not know whether Boxim was at present employed in the Colony. His last visit to the house was some time in September last. He then, looked after some houses on Kennedy Road. Regarding the mortar he said it was of very inferior quality, and the bricks were soft. He reported it to Mr. Haggard, who took no notice. At the time of our going to press the inquiry was proceeding.

THE new dies with the King's head for Volunteer Long Service Medal have now reached India from England. The medals will be struck at the Calcutta Mint and will be issued as expeditiously as possible.

A PASSENGER who arrived here last night from Canton per the s.s. *Honam* informs us that at about half past six yesterday evening, when the steamer was leaving Canton the body of a native woman was seen floating down the stream.

L. Po and Wong Pan-wah, passengers per the river steamer *Hankow* yesterday, as soon as the boat steamed alongside the wharf, got hold of another man's trunk and came ashore. On their way home they were arrested, and at the Magistracy yesterday were sentenced to three months' hard labour each.

FOR entering a grocer's shop to buy some sugar, and leaving the premises with a Chinawoman's umbrella, was the charge preferred against a native lad. He was sentenced by Mr. T. Sercombe Smith at the Magistracy this morning to receive twelve strokes with the birch and to be retained twenty-four hours in gaol.

THE Royal Engineers' Variety Club is again giving performances in their pretty little theatre, Wellington Barracks, on the evenings of Saturday and Monday next, and undoubtedly, with the splendid programme arranged, they will again be patronized by their very many supporters, who now thoroughly appreciate the endeavours of "the men who do something all round."

INSPECTOR McDonald and company raided a gambling house at No. 35, Station Street, Yau-mat, last night, and managed to arrest twelve natives who were squatting round tables playing at *gai-kow*. Before Mr. T. Sercombe Smith at the Magistracy this morning the twelve men were paraded in a row. The dealer and banker were fined \$30 or two months' each, and the remainder \$3 or seven days.

THE NEW P. & O. S.S. "PERA."

On July 23 the new twin-screw P. and O. steamer *Pera*, which Messrs. Workman, Clark and Co. (Ltd.), launched at Belfast last June, ran her speed trials in the Belfast Lough. The *Pera* is a finely modelled steamer, 495 ft. in length, with a tonnage of 7,600 gross, and a deadweight carrying capacity of about 11,000 tons. The new steamer has been specially designed for the requirements of her owners' trade with the East. The *Pera* has two complete steel decks, all fore and aft, with poop, bridge, and top-gallant forecabin, the cargo space being divided into six spacious holds by steel bulkheads, extending the full depth of the vessel. A considerable amount of accommodation has been provided for saloon passengers, the state-rooms being ranged on each side of the vessel under the bridge deck. These rooms are large and commodious, and have been fitted up in the complete fashion characteristic of the P. and O. Company. Adjoining the entrance hall is the accommodation set apart for the use of the captain, and immediately above this is situated the chart-room and navigating deck, supplied with the necessary appliances for controlling a first-class modern steamship, including telegraphs to the engine-room, telephones to all parts of the ship, and telemotor controlling gear. The propelling machinery consists of two sets of triple-expansion engines of the latest type, and steel multi-tubular boilers capable of working at a pressure of 180 lb. per square inch, with forced draught. After a most successful trial trip and cruise the *Pera* left for London, to receive a cargo for her maiden voyage. During construction the vessel and her machinery have been under the supervision of Mr. G. Manuel and Mr. H. J. Taylor, the superintendents for the Peninsular and Oriental Steam Navigation Company.—*L. & C. Express.*

THE PHILIPPINE REVENUE CRUISER "MINDANAO."

"She is carelessly built and in many details far from what she ought to be," is Commander Helm's opinion of the new Coast Guard cutter *Mindanao* just arrived from Farnham Boyd and Co.'s Shanghai shipyard, and the Commander adds that he does not care how strongly he is quoted on the subject. "It seems to me," continued the Chief of the Bureau of Coast Guard-Transportation and Lighthouse Service, "that these Shanghai shipbuilders have joined the other firms in the Orient and with them have been negligent in their work in the case of the *Mindanao*."

These remarks (according to the *Manila Cable News*) were prompted by the fact that the *Mindanao* made a trial trip on Sunday, and that Commander Helm was on board at the time to inspect her and to see what she could do. With the exception of her speed the *Mindanao* proved a great disappointment. The workmanship and the details of construction are, according to the Chief's statement, much inferior to those of ten cutters for the same service turned out by the same firm early this year.

On these first boats the work was so satisfactory that the Government did not hesitate to give Farnham, Boyd and Co. another contract when five more boats were required. The *Mindanao* left her anchorage in the bay at 9.25 a.m., Sunday, and arrived at Corregidor at 10.48 a.m. A stay of a few minutes only was made and at 10.55 the boat started on her return voyage arriving here at 12.10 p.m. Besides Commander Helm, the following composed the party on board: Captain W. Howe, Superintendent of Vessels and his Chief Clerk, J. B. Lewis; Mr. Turnbull, representing Farnham, Boyd and Co.; Captain Dow and Fred Hancock.

SALE OF THE ORIENTE HOTEL, LIMITED.

The *Hongkong Telegraph* was the first to give the news in the Colony the other day of the sale of the Oriente Hotel at Manila. From exchanges to hand to-day we learn that the big hotel has been sold to the Insular Government. It will take possession on November 1. Ah Gong, the present lessee who runs the hotel, will vacate. He has gotten enough money out of the sale of his lease to go back to China, if he wishes, and live happy forever.

The Oriente will be turned into a Government building. It will be the post office, the headquarters of the Insular Purchasing Agent, and other Government officials, and where once the cold bottle joyfully fizzed, and the but bird sized, the registered letter and the cambao buyers will reign supreme.

The deal was consummated on the 24th inst. The Government has long wanted the Oriente. The location is fairly central. It is not just what the merchants would want; it is rather a trifle too far from the Plaza Moraga and from the newspaper centre. But a proper site could not be found. McCullough, the printer, wanted a high figure for his building by the bridge of Spain, and the Oriente building was better suited to the purposes of the Government.

The property bought includes the hotel, the warehouse, and the stable that is the entire land and buildings from the front door of the hotel to the front of the stable. The price was between \$50,000 and \$60,000 Mexican. The owners of the buildings do not get all this, as Ah Gong and Walter Fitton got a slice. Fitton and Ah Gong had a lease on the premises running five years from about a year ago. For the unexpired term they asked a large sum. Over this the Government and lessees have been haggling for many weeks. Only yesterday did they finally agree.

The Government wants to get in as soon as possible. It will take months to fix up the buildings for the offices desired. The post-office accommodations, at present, are inadequate.

George Sellner looked after the stockholders in the Oriente property in the deal. It was largely through his efforts that the sale was finally made, as it took much time and hard work to bring together the different interests.

SHIPPING RETURNS.

From the returns, compiled by Lloyd's Register of Shipping, it appears that, excluding warships there were 426 vessels of 1,028,619 tons gross under construction in the United Kingdom at the close of the quarter, end of 30th June, 1903. The return shows an increase in the tonnage under construction of about 54,000 tons as compared with the figures for the previous quarter, but decrease of about 385,000 tons as compared with the quarterly total reached in September, 1901, which is the highest on record. Of the vessels under construction in the United Kingdom at the end of June, 352 of 789,510 tons are under the supervision of the Surveyors of Lloyd's Register, with a view to classification by the Society. In addition, 83 vessels of 250,000 tons are building abroad with a view to classification. The total building at the present time under the supervision of Lloyd's Register is, thus, 435 vessels of 1,043,510 tons.

RAT RETURN.

At the Sanitary Board meeting yesterday afternoon returns were submitted showing that, during the fortnight ended 24th August, 597 rats were caught of which 16 were infected. The President said this great diminution in the numbers was due to the new system only just started, and he hoped that in a few weeks they would find the numbers still higher. The high percentage showed that the supposition that rats were being introduced into the Colony was correct.

A COLLISION IN THE YANGTZE.

There was a collision in the Yangtze, near the Lismore Light, early on Sunday morning, between the British ship *Dundee* and the well-known Japanese cruiser *Naniwa*. The former vessel was anchored with only one anchor between Tsungming island and the right bank of the Yangtze, a little to the east of north of the Red Buoy, while the *Naniwa* was anchored to the north-east of the Red Buoy, and towards the Pootung shore. The wind was south at the time and the tide ebb. The strong current of the Yangtze caused the *Dundee* to drag, and she drifted down on top of the *Naniwa*, whose port cable parted, and the two vessels drifted down the river for some distance on the Pootung shore locked together, until the *Naniwa's* anchor held again and the *Dundee* drifted clear of her. Very little damage was done to either vessel, the *Naniwa* losing her port bower anchor with 75 fathoms of cable, which are now being dredged for, and having some of the deck fittings along her starboard side carried away or damaged. The cable of the *Dundee*, too, touched the *Naniwa's* starboard propeller, and it will of course be examined, but the hull of the *Naniwa* was not touched, and it will not take long to replace the davits, stanchions, accommodation ladder, leadman's stand, etc., that were damaged or carried away.

ANOTHER RUSSO-CHINESE CONVENTION.

The *Kokumin's* Peking correspondent gives the following as the text of the latest Russo-Chinese Convention. According to the *Yifu's* correspondent, it is a mere fabrication of the Russ who wish to make the Chinese believe that all the efforts of Japan against Russia are in vain:—

Art. 1.—The appointment and dismissal of the Governor-General, Chief Military Commanders, Taitols, and Prefects in Manchuria, shall be determined on consultation between the Chinese Government and the Russian Minister to China, and the Chinese troops stationed in the Three Eastern Provinces shall be placed under the control of the said Russian Minister. In case banditti make their appearance in Manchuria, the Chinese troops shall be made to suppress them, and if they are unable to accomplish that work Russia shall dispatch troops to help them.

Art. 2.—At Russo-Chinese market towns in Manchuria the trade with people of any other nation shall be foridden; moreover the working of the mines in Manchuria shall also be forbidden to the subjects of any other Power.

Art. 3.—The Customs in Manchuria shall be under the joint control of China and Russia. The railways in the same district shall, on mutual and special agreement between the parties concerned, revert to Chinese ownership after the lapse of 20 years from the date of the signing of the Treaty. No third party shall be allowed to own or work the railways.

Art. 4.—Telegraph and postal affairs in Manchuria shall be solely managed by the commissioners of Russia and China, and in case they have committed any mistake in the discharge of their duties the matter shall be dealt with by the Russian Minister.

Art. 5.—If war breaks out with any third Power or Powers on account of the present Treaty, Russia and China will jointly fight with those Powers, but in case China refuses to join in the war, Russia will undertake it alone. If the war terminates in the victory of Russia the whole of Manchuria shall be ceded to Russia. The civil and military officers of China stationed in Manchuria shall on that occasion be removed to Chinese provinces, though the ordinary Chinese people may be allowed to remain.

THE FATALITY ON THE "POYANG."

The return of this steamer to Shanghai has enabled us (V. C. D. News) to obtain, through the courtesy of Messrs. Butterfield and Swire, some further information in reference to this calamity. It is known now that the mess-room boy, who was landed sick at Wuhu before there had been any deaths on board the steamer, has since died there of cholera. The whole of the evidence obtainable as to what occurred on the *Poyang* and as to the illness and death of her five officers, was submitted to and carefully investigated by Dr. Thomson of Hankow, who has certified in a long and exhaustive report to Messrs. Butterfield and Swire, that the symptoms in the case of all those who died were undoubtedly those of true cholera. Dr. Thomson's report and the evidence have been laid before Drs. Burge and Milles here, who fully agree with his conclusions. Finally, the matter has been submitted to the Acting Chief Justice here, Mr. F. S. A. Bourne, who has given it as his opinion that Mr. Spinney, having before him the certificates of two qualified doctors that the deaths were due to cholera, was perfectly right, in the absence of any cause of suspicion, in giving a burial order, an inquest under such circumstances not being necessary.

FLOATING DOCK FOR MANILA.

A floating dock for the accommodation of passengers, to facilitate their landing, and to enable them to gain possession of their baggage, is the latest addition planned by the Customs House. This dock will be built almost immediately and it will be located as near as possible to the frontage of the Baggage and Immigration departments. It will be adjustable to the tides and the builders will take similar docks successfully in use in Japanese ports for models.

Insular Surveyor Cairns, who has given the matter much attention while on his recent tour to Japan, will superintend the building of the dock personally and will see to it that it fills every requirement for it is a much-needed improvement on the present mode of landing passengers.—*Manila Cablenews.*

ABACA: THE PHILIPPINE STAPLE INDUSTRY.

II.

(Specially written for the "Hongkong Telegraph.")

[Continued]

"Left to himself the native cuts the plant at any time of maturity. When he is hard pressed—for a dollar or two, he strips a few petioles, leaving them for days exposed to rain and atmosphere to soften and render easier the drawing of the fibre in which putrefaction has commenced. The result is prejudicial to the dealer and the plantation owner, because the fibre discolours" (and weakens—F.M.J.S.). "Then he passes the bast under a toothed knife, which is easy to work" (and spoils the fibre more—F.M.J.S.), and goes down to the village with his bundle of discoloured, coarse fibre with a certain amount of dried sap on it to increase the weight. He chooses night time for the delivery; firstly, because the acopiador (buyer, comprador) may be deceived in the colour, upon which depends the selection of quality; and, secondly, in order that the fibre, absorbing the dew, may be heavier. These are the tricks of trade well known to the native."

The writer may complete Mr. Foreman's experiences with the remark, that the dear innocent creature, as a rule, feels much too tired to do the rough work of stripping the stem and puts most of that business off on benevolent mother Nature. He simply cuts the leaves off and suspends the stem from a low jungle tree until it has got sufficiently rotten, to make the stripping a child's play.

No wonder, therefore, that the native, who in a week's work can earn \$4 without overstraining himself, remains a hopeless pauper. Also it seems pretty reasonable, that the quality of the fibre is decreasing at the same rate as the self-esteem of the Filipino increases. As an American citizen he is, of course, a different man from the former Spaniard subject (2nd class) and he feels considerably more as a gentleman far exalted above all humble toil.

He is even benevolent enough to prevent the Chinaman from overstraining with hard work and helps short-sighted people to keep the Chinese coolie out of the Philippines in order to "work" the islands for the *dules far niente* of the "children of the soil." The world at large and especially the shipping benefits by this ideal state of things through paying an exorbitant price for a product, which in a far better quality at a great profit can easily be produced at half the price it now commands in the market. Sailors and ship officers, whose limbs are badly damaged by the breaking of hawsers in making fast the ship—nowadays a familiar occurrence—have a special reason for gratitude to the languid Filipino and his paternal Government.

The writer therefore insists especially on his previous statement, that fibre produced in a regular plantation will be infinitely superior to the product of the national labour or the national indolence of the Filipinos. Plantations worked after the methods of the Ceylon and the Assam tea planter, Java coffee, Sumatra and Borneo tobacco plantations are impossible in the Philippines and hundreds of square miles of the former plantations belonging to erstwhile rich owners are laying waste. The intelligent native has raised his standard of life and pretensions at the ratio of the old Spanish peso to the American gold dollar. He used to sleep and loaf half his life in old times and he scarcely ever awakes to any kind of work now. Even the tremendous profit of hemp growing is disappearing before such a complete Utopian life. Formerly, the owner gave his working men the value of half the hemp extracted as a price for the work of extraction. Now even that enormous remuneration is insufficient to persuade a man to do a good day's work, when he can get an Eagle dollar for scarcely any toil.

The planting of abaca requires very little labour. It is more a matter of time and patience than of intelligence and heavy expenses. All there is to be done is: Clearing and burning jungle, planting the young shoots, which in old plantations issue in enormous numbers and, during about one and a half years, keep the plantation moderately clean. After that time the enormous leaves of this banana tree overshadow the soil and choke all herbs, while the roots extend to a depth of nearly two feet and spread over almost all the soil, leaving no food for any other plant. All writers on the Philippines declare, that the development of a plantation from young shoots requires three years and from seeds, for the hemp banana carries, like all wild growing plants, many seeds, at least four years.

The writer has his doubts about this statement and ascribes the slow growth to the slow and much interrupted work of the native. Anyone interested in banana growing can take the proof himself and will find that a single shoot planted in the ground at the end of a year has become a full grown tree with at least a couple of shoots, and after the second year, a whole cluster of stems will have been formed. The fact is, that Suanlamba plantation (Sandakan Bay, B.N. Borneo) had a perfectly developed banana field of about 60 acres exactly two years after the first start. The photos taken at that time do not admit of the slightest doubt on that score. Two years, therefore, must be considered a minimum of time required for the outlaying of a hemp plantation. Three to six months are to be added for the time required by cutting a burning jungle, building houses and laying out the fields and roads, drainage, etc. A manager with one assistant and about 120 coolies can easily perform all the work required and, decorate at the same time the ripe stems amounting to at least one, but probably to three or four trees per cluster, i.e., about 700 to 2,800 plants per acre. Left to themselves the plants produce clusters of twelve to fifteen trees in about three years (Jagor). It is, however, better

ASK for ASAHI JAPANESE BEER—G. Girault.

to restrict the stems to eight per cluster, as the chance for a good development of the stems is augmented by this system. The cutting of shoots to serve for the extension of the plantation or are thrown away.

A Manila hemp plantation practically lasts for ever, for the plant is really a wild herb possessing all the luxuriant growth and vital power of these children of chance. (The harvesting lasts 50 to 60 years.—Jagor, *Travels*, etc.) A single tree has sometimes been known to produce two lbs of hemp, the average yield will, however, scarcely exceed half lb and it will be advisable to take this as the basis of calculation, which gives 4,480, or in round numbers 4,500 trees to the ton.

An acre, planted at 8 x 8, with 8 stems per cluster, therefore should give about 5,600 stems, or 14 tons. The trees harvested are replaced by the ever-reproducing root in an almost incredibly short time. The writer, however, cannot give any positively reliable figures on this head, as his visit to Suanlamba has been too short to allow of a positive statement. The manager declared three months sufficient for the development of a new stem from an old root. Foreman gives the following particulars:—

The average weight of the dry fibre extracted from the plant equals 10 ounces or say two % of the total weight of stem and petioles.

The length of the best ready for manipulation at the knife, averages in Albay 6 feet 6 inches. In Suanlamba the average length of fibre was about 8 feet and some exceptionally high trees have even produced small quantities of hemp 3 feet long. The average yield of fibre was 7 ounces a tree, but I doubt that a proper choice was made and only ripe stems used. The manager told me that he had repeatedly sent small quantities to the Hongkong Rope Manufacturing Co. The samples sent to Europe have been declared exceptionally beautiful by experts. In general, there seems to be no doubt, that this fibre ranks with the very best product of the Philippine islands.

(To be continued.)

KANG YU WEI.

On the 22nd inst. we published a "special" from our Ipoh correspondent giving an account of the reception accorded to Kang Yu Wei in the Malay States. From Penang exchanges, we learn that the celebrated Chinese Reformer, arrived at Ipoh (F.M.S.) on the 18th inst., by train from Taiping, and was cordially welcomed by the Chinese and Europeans, amongst whom was Mr. Cowan, Protector of Chinese. Kang Yu Wei then drove to the Mining Association, accompanied by Messrs. William Cowan, Claude Ley Kum, Ho Pak Leung, Lim Loke King, Gim Ah Choon, Kang Kit Sang, Cheah Cheang Lim and others. At noon Kang Yu Wei and a party visited the hospital, and he was to leave for Batu Gajah by the 1.30 train.
